

# Cross-Media Measurement: New Horizons

**IAC/Spir Conference 2015**

9<sup>th</sup> April, 2015

**ATTILA WEISZ**

**Business Development Director**

**[www.gemius.com](http://www.gemius.com)**

Let's Meet

## JIC Standard:

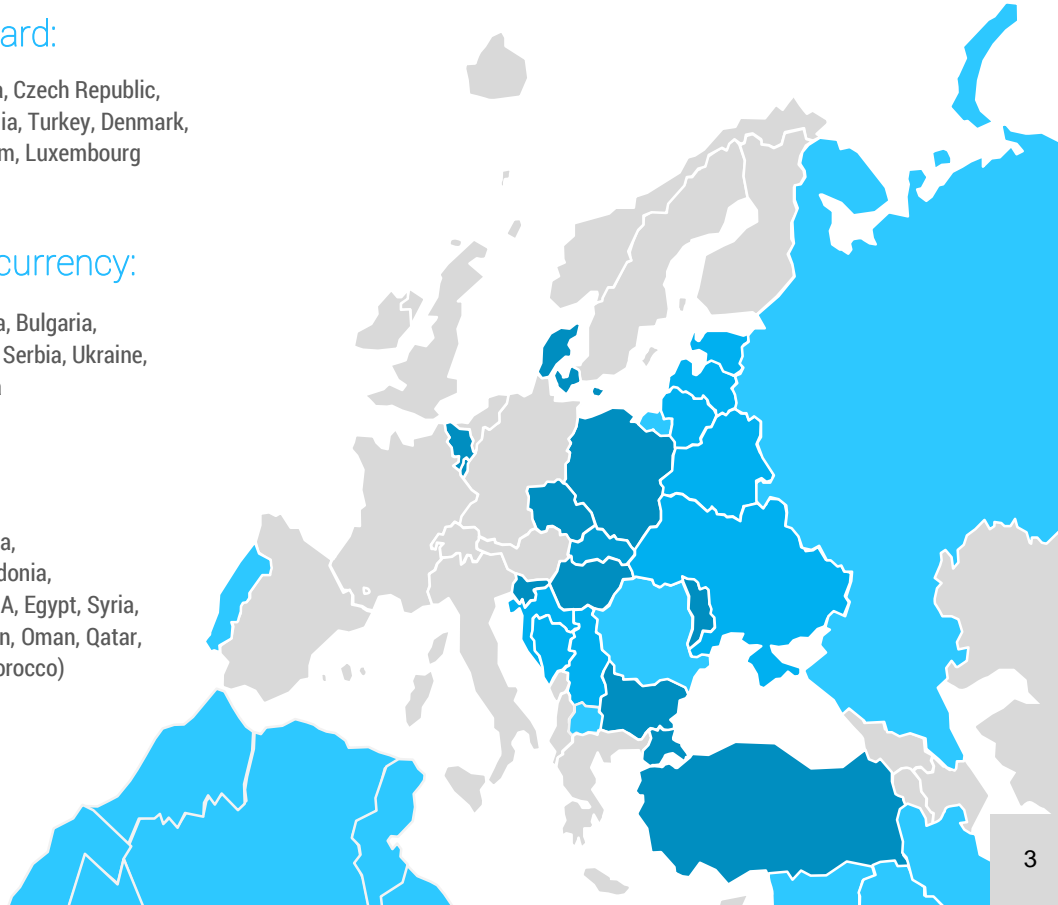

Poland, Slovakia, Czech Republic,  
Hungary, Slovenia, Turkey, Denmark,  
Moldova, Belgium, Luxembourg

## De facto currency:

Lithuania, Latvia, Bulgaria,  
Bosnia, Croatia, Serbia, Ukraine,  
Belarus, Estonia

## Start-up:

Russia, Romania,  
Portugal, Macedonia,  
MENA (UAE, KSA, Egypt, Syria,  
Lebanon, Jordan, Oman, Qatar,  
Iraq, Kuwait, Morocco)

# Deduplicated Cross-Media Reach:

What is it & Why bother ?

## Deduplicated Cross-Media/Platform Reach:

1mio surfers on one PC-website + 0.4mio on same Tablet-website

$\neq$  1.4mio Total Reach (← because of duplication)

## Deduplicated Cross-Media/Platform Reach:

2mio video viewers on one TV-Channel + 1mio stream views on same TV's online stream

$\neq$  3mio in Total (←because of duplication)

## If we can deduplicate, business-wise it will:

e.g.

- Increase Total Ad Inventory of a Single Content
  - larger inventory for Publishers, better Integrated Marketing Solutions to Advertisers
- Help Optimize CPT/CPM Prices
- Be applied at
  - program-level // ad-level
  - platform-level (PC, SmartTV, Tablet, etc.)
  - media-level (TV, Internet, Print, Radio, etc.)

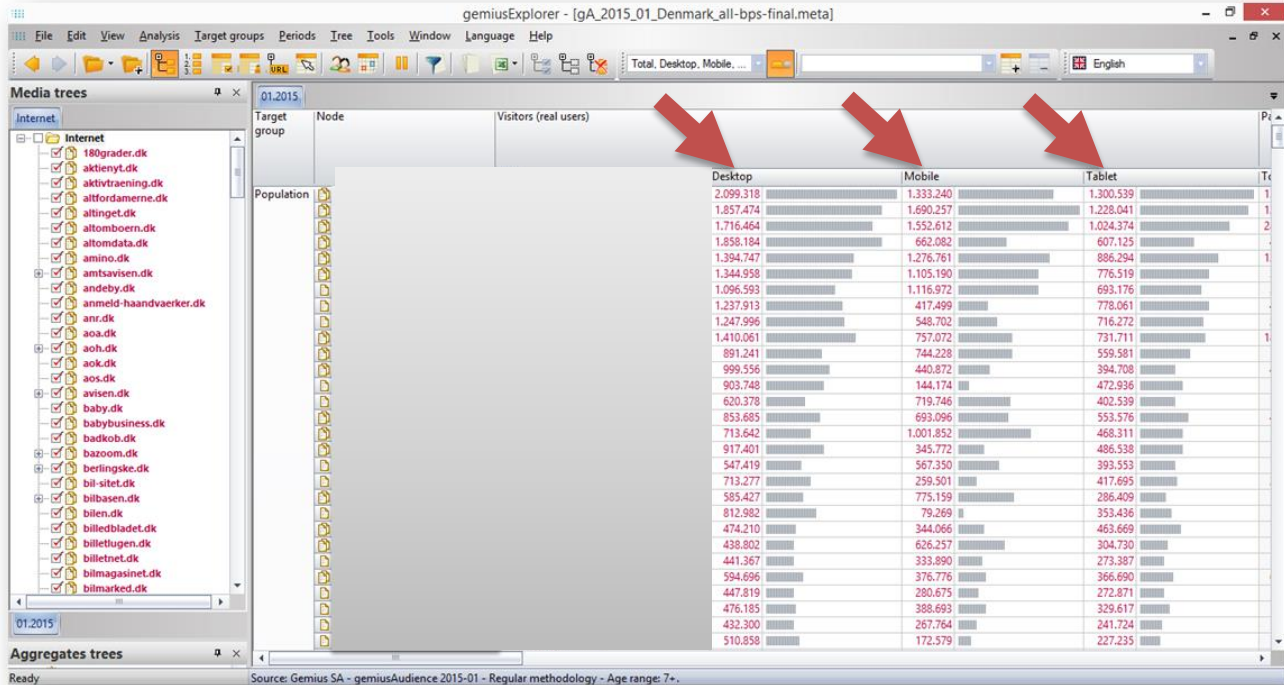

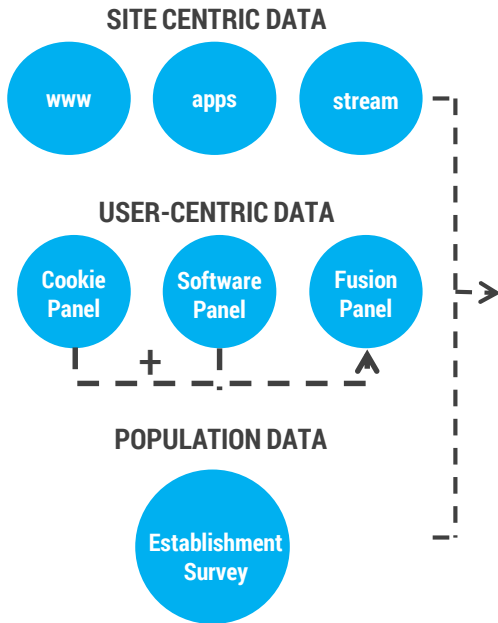

Without Further Ado → Working Example

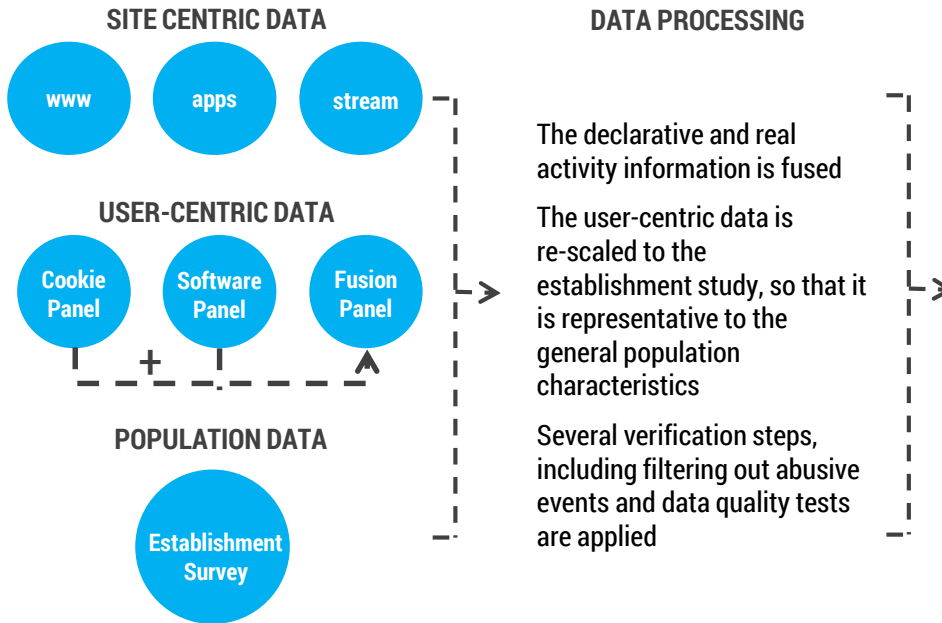

Denmark

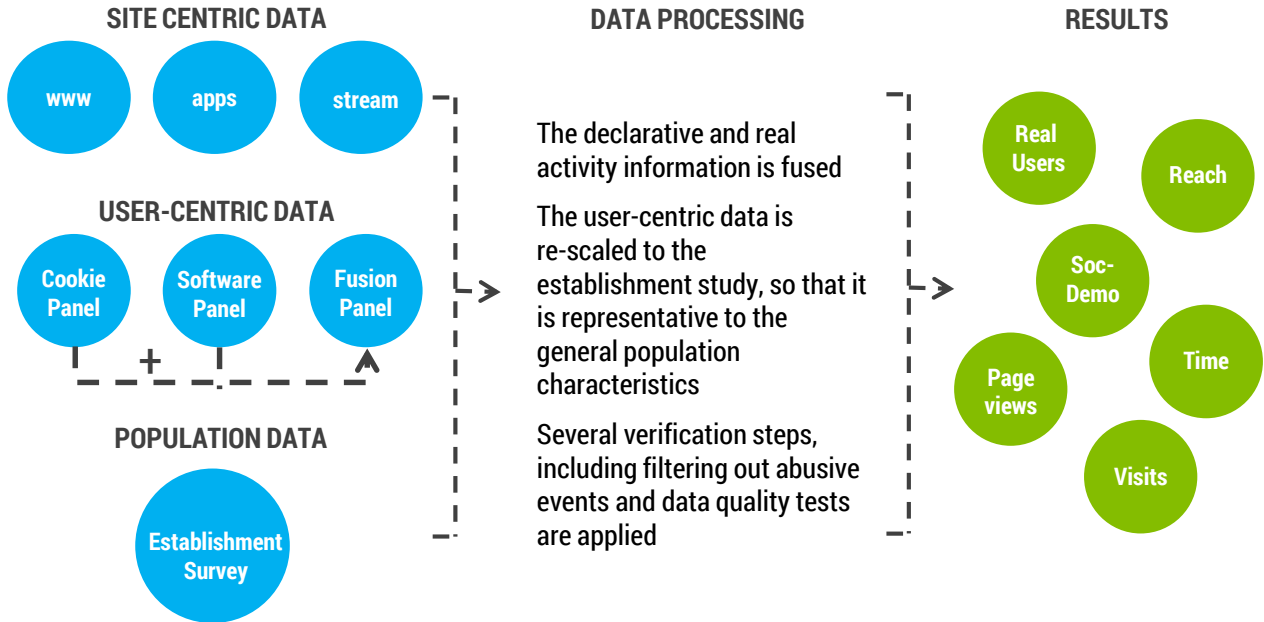

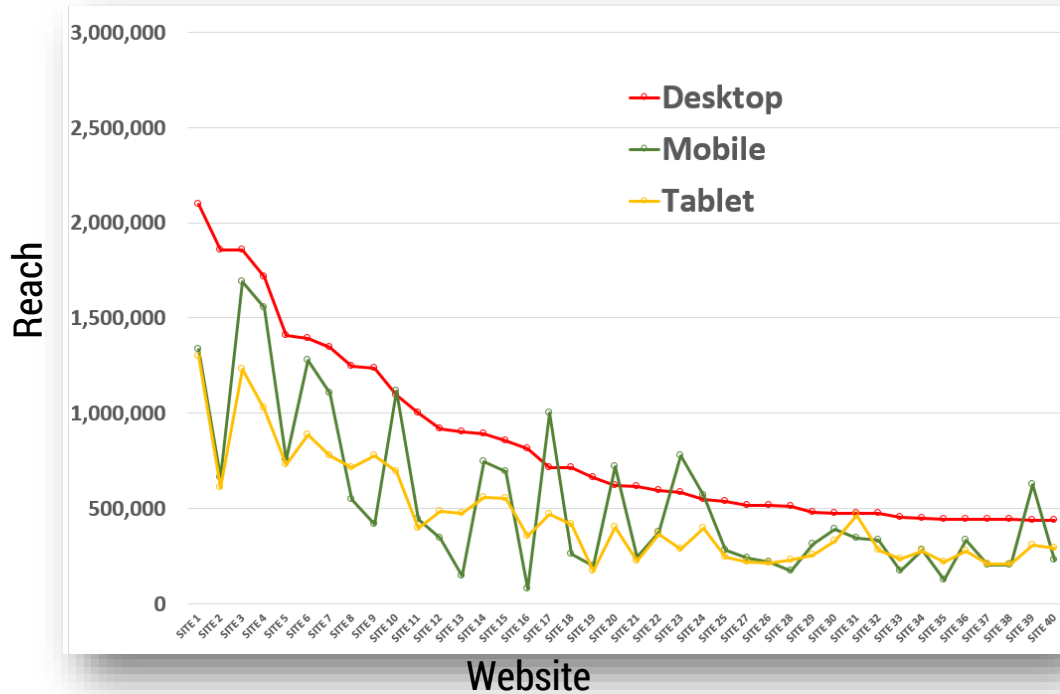

## Previous Set-up – Reach of Top Websites

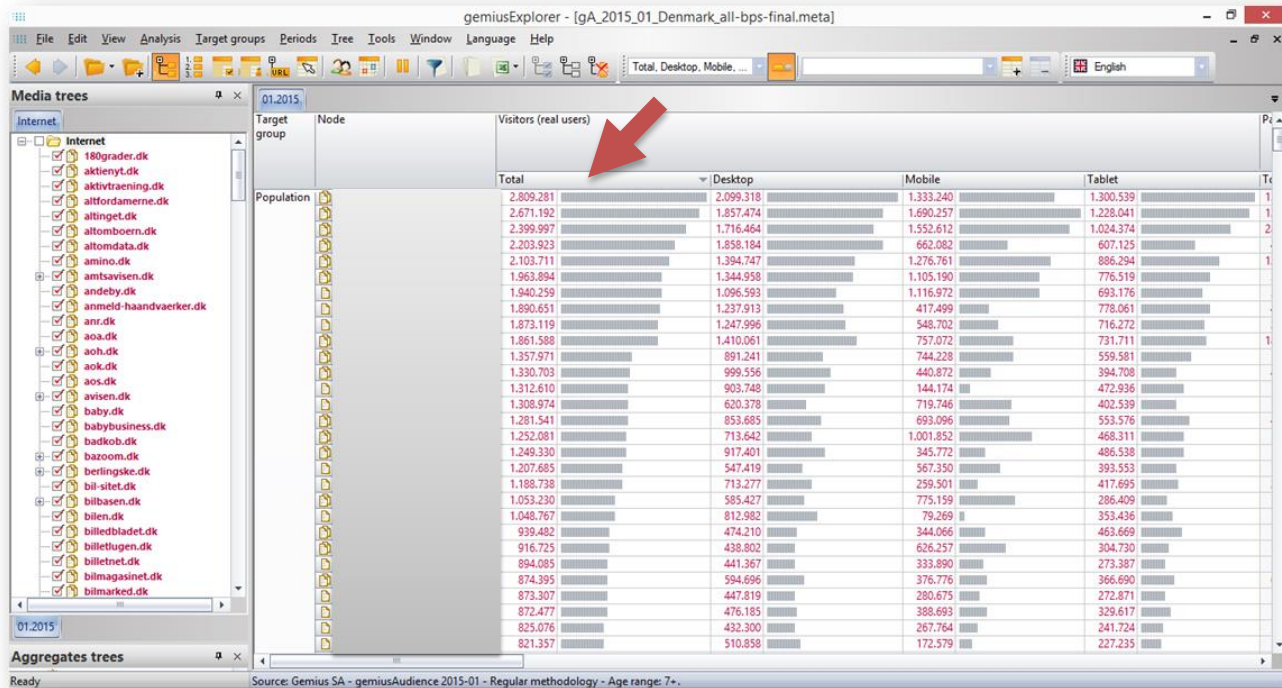

***BREAKING  
NEWS:***

Total Reach is Official  
Currency in Denmark from  
Q1 2015

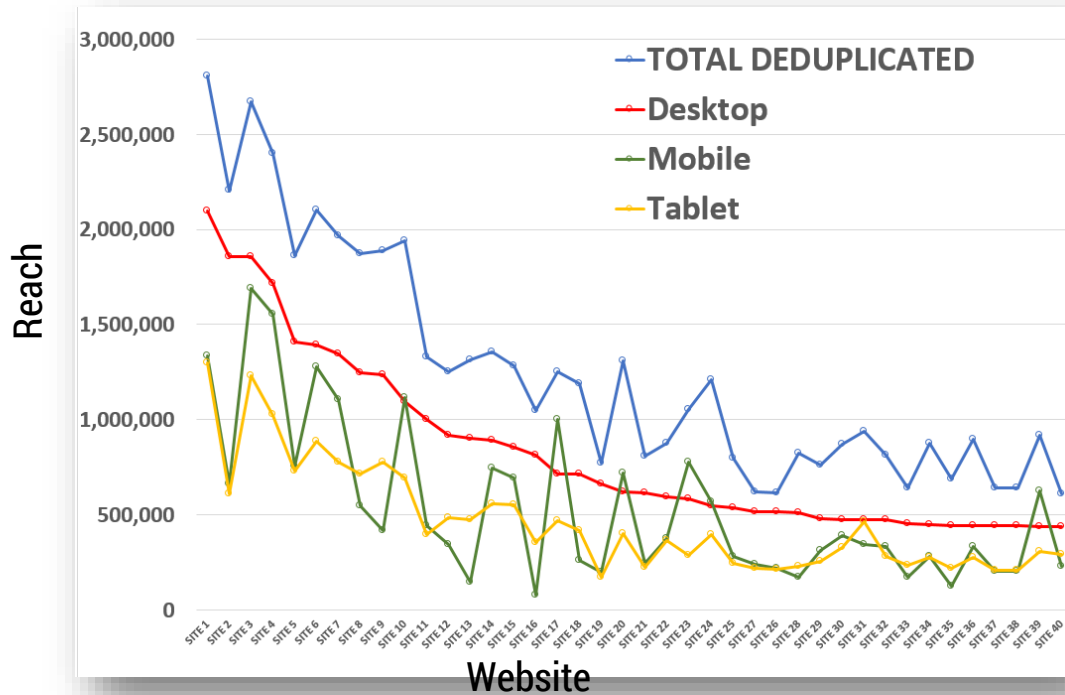

# New Currency Launched in Q1, 2015

## New Set-up – Reach of Top Websites

## New Set-up – Additional Inventory

# That was Denmark

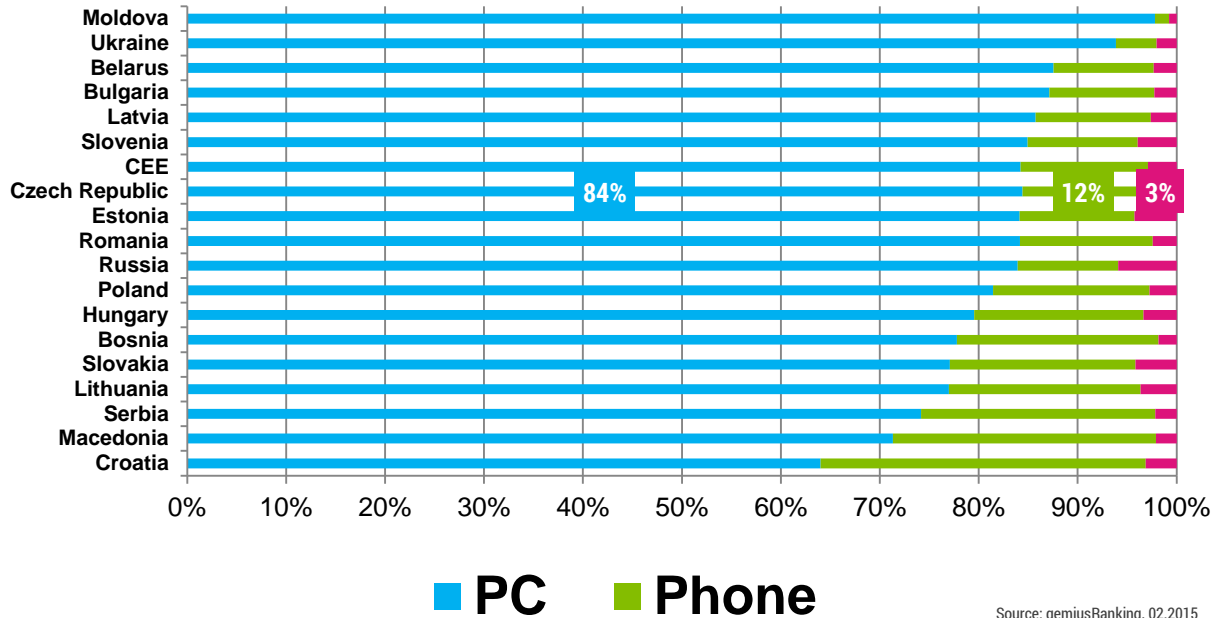

## But How About CZECH REPUBLIC?

Source: gemiusRanking, 01.2011-02.2015  
 CEE: (Belarus, Russia, Ukraine, Lithuania, Latvia, Estonia, Hungary, Czech Republic, Poland, Slovakia, Serbia, Slovenia, Romania, Bulgaria, Croatia, Bosnia, Macedonia, Moldova)

 CEE: (Belarus, Russia, Ukraine, Lithuania, Latvia, Estonia, Hungary, Czech Republic, Poland, Slovakia, Serbia, Slovenia, Romania, Bulgaria, Croatia, Bosnia, Macedonia, Moldova)

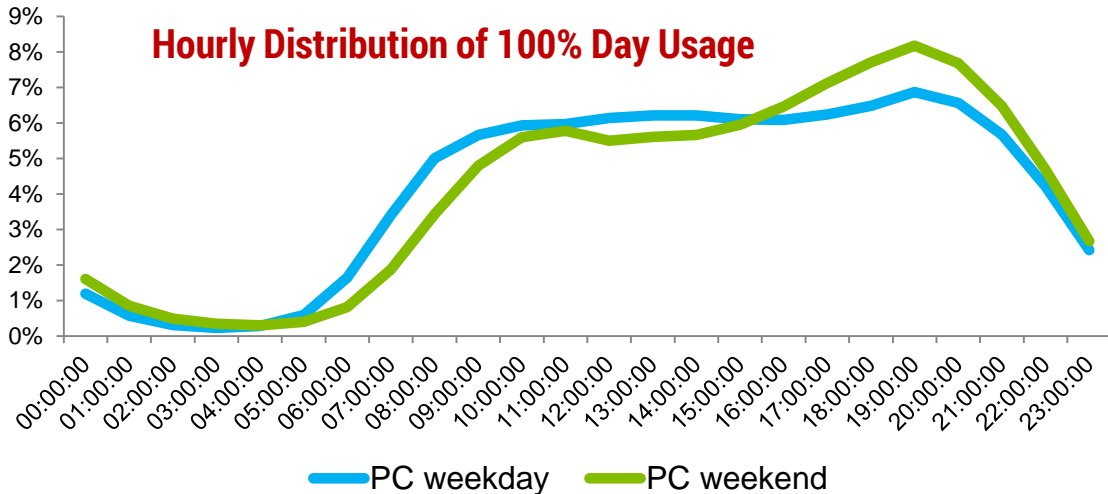

Not only different devices are used, but also Internet **consumption patterns** are strictly **different** on each device type

# Daily Usage of PC in Czech Republic (Weekday vs. Weekend)

Source: gemiusRanking, 16, 22.02.2015

# Daily Usage of **SmartPhones** in Czech Republic (Weekday vs. Weekend)

Source: gemiusRanking, 16, 22.02.2015

# Daily Usage of **Tablets** in Czech Republic (Weekday vs. Weekend)

Source: gemiusRanking, 16, 22.02.2015

It is no longer enough for publishers to tell audience **data on individual single platforms** only, but more and more important to tell **deduplicated total reach** and **audience composition** for the given piece of content

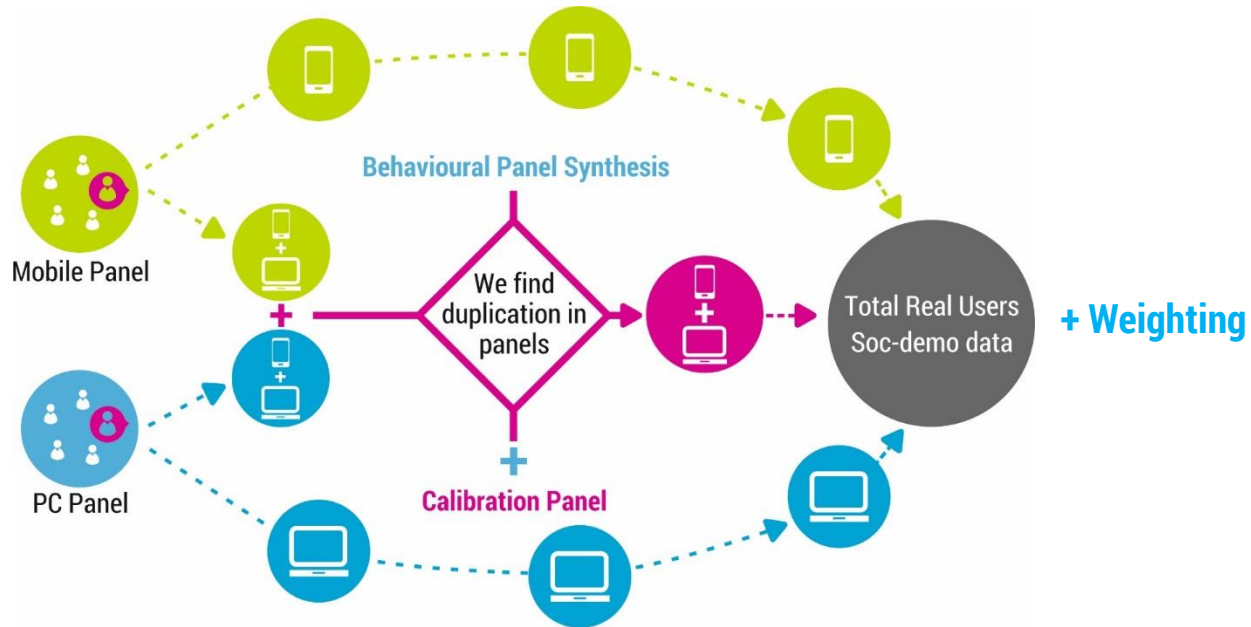

So, back to Methodology  
– How is it done?

# Behavioral Panel Synthesis™ (BPS™) – Overview

# Behavioral Panel Synthesis™ (BPS™) – Overview

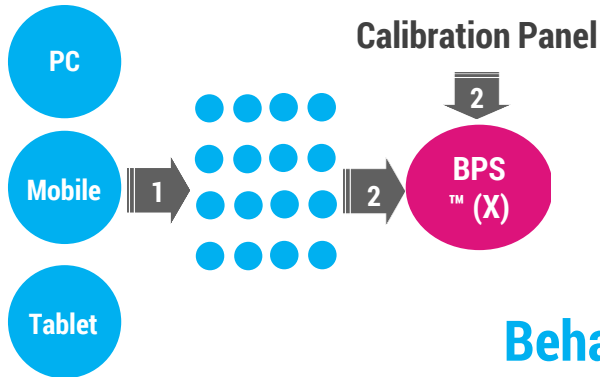

## Behavioural Panel Synthesis:

### 1. Metrical clustering

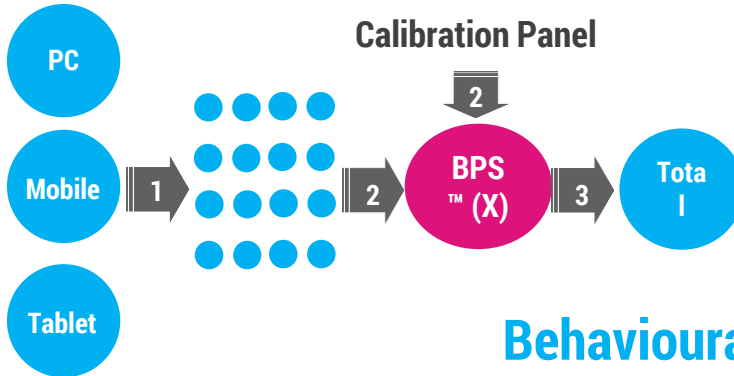

- ## Behavioural Panel Synthesis:
1. Metrical clustering
  2. Logistic regression distance

## Behavioural Panel Synthesis:

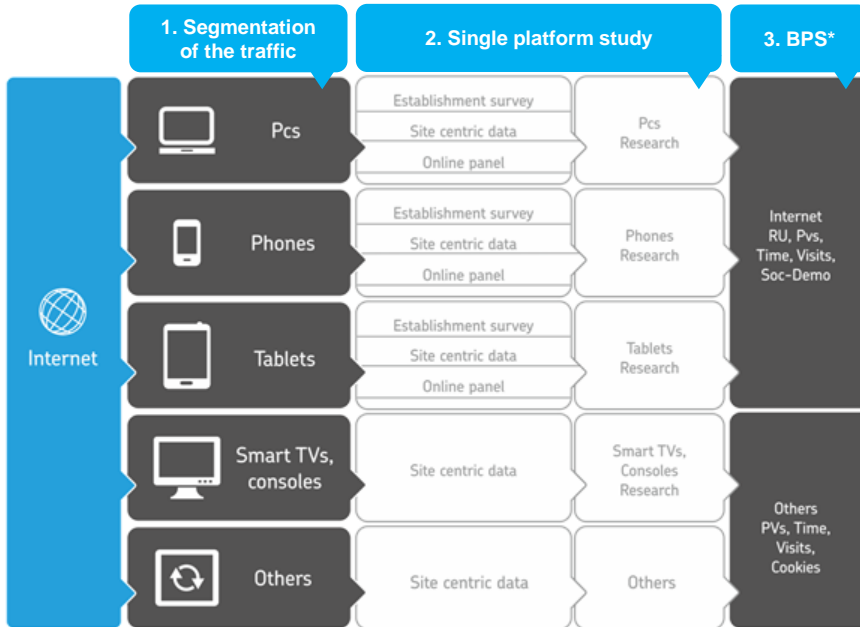

1. Metrical clustering
2. Logistic regression distance
3. Nearest neighbour merging

A hand in a dark suit sleeve holds a glowing blue globe with a grid pattern. The globe is surrounded by various digital icons, photos, and floating text characters like '@', 'B', 'L', 'M', 'A', 'E'. The background is a blurred, futuristic environment with light trails and bokeh effects.

# How About Full Cross-Media: Internet, TV, etc.?

\*BPS= Behavioural Panel Synthesis

\*BPS= Behavioural Panel Synthesis

**Integrating and deduplicating TV and internet data.**

**Proof of Concept Project running – Test Results to Come**

Model Applicable to Radio, Print, etc...

... so get yourself  
ready for  
**Cross-Media  
Measurement...**

Gemius SA  
18 B Postępu Street  
02-676 Warsaw

# Thank you!
